

## Connecting with our Grandchildren

We can't wait for fiber-optic cable to get to our home in New Salem!

Our oldest grandson and his girlfriend would keep in touch via Skype if I had faster Internet. They live in Cambridge, are both very busy with school and work.

Our middle grandchild is a 'Shoutcaster' for Internet games. He misses out on important practice when he chooses to visit. With fiber-optic connections here, he would visit us more.

Our granddaughter will be visiting Spain as a high school exchange student. We want to be able to stay in touch via Skype.
