

Connecting with our Work and Family

We can't wait for fiber-optic cable to get to our home in New Salem!

I teach chemistry at Amherst College and my husband works in Andover. We both require internet for our work. I routinely watch, make and post videos for my classes, but cannot do this at home without Fiber. We have a 1 year old boy, Asa, who will need the internet to do homework (in a few years!).

My family lives in Pennsylvania. Asa's grandparents want to Skype with him so he knows them well as he grows up.

Asa's cousin Gabe is only 4 months younger than Asa and lives in PA. It would mean so much to have Asa and Gabe stay close as they grow! To do this we would love to Skype with them, but can't with our current internet provider.
